

SPRINT 2 REVIEW

07 MAY 2021 / 9:30 AM / GOOGLE MEET

ATTENDEES

Rylan Perumal, Kananelo Mokoko, Khanani Mathebula, Phindulo Makhado, Sibabalo Luqhida, Olwethu Goniwe, Lethokuhle Dubula, Musa Mofomate

ABSENTEE(S)

Mayibongwe Bafoly

AGENDA

1. Demonstrate app to client and what has been achieved from Sprint 1 and Sprint 2.

ACTION ITEMS

1. Demonstrate app to client and what has been achieved from Sprint 1 and Sprint 2:
 - a. User Registration and User Login were working. A few minor details had to be corrected. Client suggested:
 - Assign logout button. When the user logs out, they must be directed to sign in/login page. After registering, the user must be directed to the home screen.
 - Clear text fields (email username and password) after logging in (and registering)
 - Add a user type table that will be a foreign key to the users table*. The problem that must be resolved is that a patient user should strictly log in as a

patient and not a doctor. That is, user credentials should specifically cater for one user type.

- Add a calendar widget for the date of birth textfield
- Capitalise the 'E' in Email(just a minor detail).
- Put a box around the edit text fields e.g log in page:username and password.
- Get the profile of (both) the user working.
- Calendar cardview can be removed
- Last point was hard to write: essentially have an appointments list:
 1. active/future and past appointments, categorize by date
 2. For doctors: filter out the doctors that the patient has seen. In the display, show the doctor's name, speciality and last visited.

NOTES

- * The problem with this is that we don't have a single users table. We have two users' tables, one being for Patients and the other for Doctors.
- On the patient home screen, I noticed there are bookings and Appointments. I think to avoid confusion we need to rename those cardviews, because generally, a booking is sort of an appointment.

NEXT WEEK'S AGENDA

1. Prepare for the next SPRINT 2 RETROSPECTIVE MEETING on the 10th of May 2021.
2. Set up a SPRINT 3 PLANNING MEETING.
