## Agenda

### Last Meeting Follow-up (including some discussions on WhatsApp)

1. The group concluded the group name, the project list and submitted them to our Lecturer.
2. Our project was chosen to be Mobile Patient Tracker and our client is Rylan Perumal  
rylan.perumal@wits.ac.za

### New Business

3. Project environment setup.

## Notes

- Jonas recommends we use flutter for our project. View the document he shared on TravisCi.

## Action Items

1. Scrum master is to set up a Sprint Planning Meeting with Rylan, so that he can make known to us the requirements of the product.
2. Team to agree on programming language and other programming tools to use for the project.
3. A member will set up a GitHub repository and invite members to join in. TravisCi must be set up for that repo.

## **Next Meeting Agenda**

To be deliberated on in the whatsApp group.
